## PREFACE

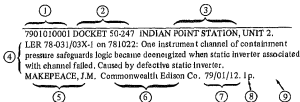

The *Title List of Documents Made Publicly Available* is a monthly publication. It contains descriptions of the information received and generated by the U. S. Nuclear Regulatory Commission (NRC). This information includes (1) docketed material associated with civilian nuclear power plants and other uses of radioactive materials and (2) nondocketed material received and generated by NRC pertinent to its role as a regulatory agency. As used here, *docketed* does not refer to Court dockets; it refers to the system by which NRC maintains its regulatory records. This series of documents is indexed by a Personal Author Index, a Corporate Source Index, and a Report Number Index.

The docketed information includes the information formerly issued through the Department of Energy's Technical Information Center under the title *Power Reactor Docket Information* (PRDI) and, in addition, information received or generated on other uses of radioactive materials. The last issue of PRDI, published in January 1979, was an annual cumulation of the information for 1978. The *Title List* series initiated by this document replaces PRDI, which will no longer be prepared. Plans for providing microfiche of the docketed material will be announced in a future issue of the *Title List* and in other mailings and announcements.

We are making the monthly issues produced in 1979 available free to all who subscribed to PRDI in Calendar Year 1978. We are doing this to encourage your comments, criticisms, and suggestions. In particular, if there are title descriptions that are not meaningful, please let us know so that we can correct the data base. In so far as possible, we would like this document to be a valuable part of your reference material. Near the end of 1979, subscriptions will be solicited for Calendar Year 1980 at a fee yet to be established.

### DOCKETED ITEMS

The principal elements of the docketed item entries are:

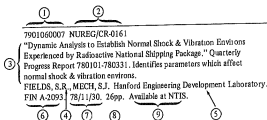

1. NRC Accession Number.
2. NRC Docket Number.
3. Name of facility, licensee, or transportation package model number.
4. Description of information contained in the document.
5. Personal author. An asterisk in this position indicates that there is no personal author.
6. Corporate, agency, or nonindividual source.
7. Date of document described.
8. Pages in document.
9. If this space is blank, the document is available in the NRC Public Document Room, 1717 H St., N.W., Washington, D. C. 20555. If this space is filled, the entry may be "Available at NRC" with or without a price; "Available at NTIS"; or "Available at GPO".

The Docketed Items list is arranged sequentially, first by Docket Number and then by Accession Number. Indented items are enclosures to nonindented items and generally are out of Accession Number sequence.

If the docketed document has a contract (FIN) number or a formal report number, it will appear in the last line of the item following entry 6.

#### NONDOCKETED ITEMS

The principal elements of the nondocketed items are:

1. NRC Accession Number.
2. NRC Report Number.
3. Title and description of information contained in the document.
4. Personal author(s). An asterisk in this position indicates that there is no personal author.
5. Corporate, agency or other nonindividual source.
6. Contract or financial (FIN) number (if any). If the document has a secondary report number it will appear following this entry.
7. Date of document described.
8. Pages in document.
9. If this space is blank, the document is available in the NRC Public Document Room, 1717 H St., N. W., Washington, D.C. 20555. If this space is filled, the entry may be "Available at NRC" with or without a price; "Available at NTIS"; or "Available at GPO".

The Nondocketed Items list is arranged sequentially by Accession Number. Indented items are enclosures to nonindented items.

## 16. ABSTRACT (200 words or less)

This document is a monthly publication containing descriptions of information received and generated by the U.S. NRC. This information includes (1) docketed material associated with civilian nuclear power plants and other uses of radioactive materials and (2) nondocketed material received and generated by NRC pertinent to its role as a regulatory agency. The docketed information includes information formerly issued through U.S. DOE's Technical Information Center under the title Power Reactor Docket Information (PRDI). This document replaces PRDI, which will no longer be prepared. It is indexed by a Personal Author Index, Corporate Source Index and Report Number Index.
